

FRUEHAUF
Designed to last

MaxiSpeed

FROM MAXIMUM PAYLOAD TO MAXIMUM VOLUME

CLASSIC

EASY

LIFTOP

COILER

MaxiSpeed Range

The MaxiSpeed curtainsider represents the ideal answer to the logistical and just in time obligations: ease of loading and discharging, reduction of idle time, increasing productivity. The MaxiSpeed range offers transport solutions from maximum payload to maximum volume:

CLASSIC, Economical multi purpose.

EASY, Polyvalent with variable heights.

LIFTOP, For more loading height.

COILER, Dedicated to steel products.

Total protection of the rear by large galvanised buffers

Running gear, the top technology from the major axle manufacturers

Fully welded platform structure with I-beam cross bearers at a pitch of 400 mm

ROBUST

Designed to last

The requirements of the transporters have largely changed these last years and have reverted back to a requirement of robustness, with no premature wear and risk of standstill of the trailers. With vehicles exploited full time, immobilisations are extremely costly.

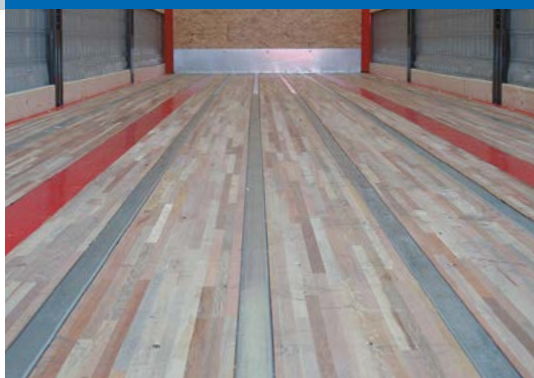

Since always, FRUEHAUF designs and manufactures vehicles of which the robustness is highly appreciated in the market. Our fully welded chassis frames, our sturdy floors and our strong body design are perfectly adapted to intensive and heavy duty use.

Side posts in high tensile steel strongly locked onto the siderave

Laminated hardwood floor 35 mm thick with steel omega profiles

Reinforced and corrugated front wall in steel or in aluminium

MaxiSpeed Range

SAFETY

The MaxiSpeed range has been designed for maximum safety around two major aspects :

- Safety of the operators in touch with the vehicle, by the ergonomics of the components and adapted equipment.
- Safety in road behaviour by the integration of electronic driver assistance systems, increasing the passive and active safety of the vehicle.

SAFETY OF THE OPERATORS :

Adjustment to dock level from inside the trailer

Automatic actioning of the parking brake

Universal lashing system

Safe release of stanchions under pressure

SAFETY IN ROAD BEHAVIOR :

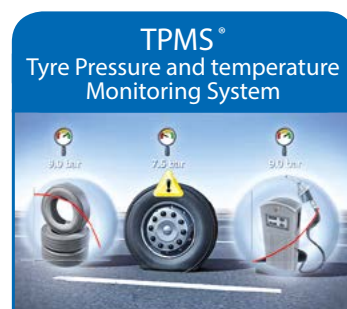

Electronic operated brakes and stability system

Protection against reversing accidents

Maintains tyres automatically at the correct pressure

Monitors tyre pressure and temperature

The FRUEHAUF style

To design vehicles adapted to the requirements of our clients also means to propose vehicles which can please from an aesthetical viewpoint.

The FRUEHAUF style has always integrated the aesthetics in the design and manufacturing of its products.

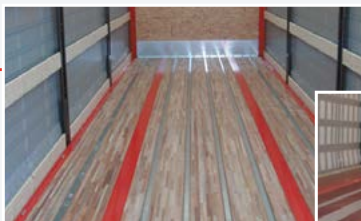

From side loading of light weight products, to frequent loading with heavy forklift trucks on the floor : the diversity of these types of transport requires perfectly adapted trailers.

A single standard model can not optimally fulfil both requirements.

Fruehauf proposes thus in standard several alternatives for floor, front wall and side walls.

FLOOR:

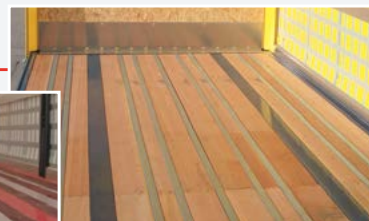

FROM TRADITIONAL
TILL MOST DEMANDING

Laminated 35 mm
Hardwood
Steel omega profiles

Mixed aluminium/wood
for maximum payload

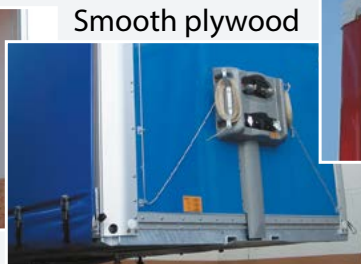

Solid hardwood planks
Steel omega profiles
resistant against
punching

FRONTWALL:

THE CHOICE
OF AESTHETICS
AND TYPE OF USE

Corrugated steel or
aluminium

Smooth plywood

Adjustable

SIDE CURTAINS:

FROM 900 gr/m² CURTAINS
TILL REINFORCED SIDE WALL
WITH DROP SIDES

Curtain in 900 gr/m²

Anti theft
reinforced
curtain with
reinforced side

Drop sides

CLASSIC

ECONOMICAL MULTI PURPOSE

The easy handling and the speedy and safe opening and closing make the MaxiSpeed CLASSIC largely multipurpose and perfectly suitable for all traditional types of transports : Industrial supplies, Long distance, Groupage and Distribution.

7 MODELS FROM 2700 TO 2900 MM

SIDE ACCESS HEIGHT / NECK THICKNESS

EUROTRAILER – Coupling height 1100 mm	MAXITRAILER – Coupling height 1000 / 1050	MEGATRAILER – Coupling height 950 mm
2700 / 150 mm	2750 / 150 mm	2900 / 90 mm
2750 / 120 mm	2800 / 120 mm	
2800 / 90 mm	2850 / 90 mm	

EASY

THE POLYVALENT CURTAINSIDER

Height adjustable roof

Liftable roof for loading

Fixed height alu doors

Multiple coupling heights

The MaxiSpeed EASY is the solution for a large variety of cargo flows, from the maxi-volume of the automotive industry to the maxi-weight of full trailer loads.

Height adjustable from 2,75m to 3,05m on the front wall and from 2,90m to 3,05m at the rear, within the European 4m overall height.

1 POLYVALENT MODEL - MULTIPLE COUPLING HEIGHTS

SIDE ACCESS HEIGHT / CHASSIS NECK THICKNESS

EUROTRAILER – Coupling 1100 mm	MAXITRAILER – Coupling 1000 / 1050 mm	MEGATRAILER – Coupling 950 mm
FRONT 2750 to 3050 / 90 mm	FRONT 2800 to 3050 / 90 mm	FRONT 2900 to 3050 / 90 mm
REAR 2900 to 3050 mm	REAR 2900 to 3050 mm	REAR 2900 to 3050 mm

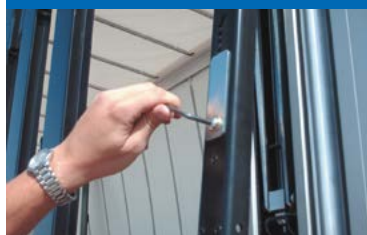

L I F T O P

VOLUMINOUS TRANSPORTS FOR THE AUTOMOTIVE INDUSTRY

Lifting handle in each
corner

2 height positions
4 meters and + 50 mm

Roof thickness of 45 mm
over the full internal width

Sliding side post with spring
compensation

2 MODELS FROM 2850 TO 3000 MM
Single or dual ride height

SIDE ACCESS HEIGHT / NECK THICKNESS

MAXITRAILER – Coupling height 1000 / 1050 mm

MEGATRAILER – Coupling height 950 mm

2850 / 150 mm

2950 / 90 mm

2900 / 90 mm

3000 / 90 mm

COILER

Transport of steel products is regulated by extremely severe safety and product protection rules. The MaxiSpeed COILER fulfils all these requirements while guaranteeing optimal productivity for industrial loads.

PERFORMANCE IN STEEL PRODUCTS TRANSPORT

Strong and light weight coil well covers

Anti roll over stanchions

7 pairs of lashing rings around the coil well
6,5 tons capacity

Coil well with 35° angle

MAXIMUM PAYLOAD

The rigidity of the chassis needed for transport of coils is assured by the use of high tensile steels.

INTERNAL HEIGHT MAINTAINED

The chassis neck thickness allows a standard side-access height, compatible with most current palletised freight.

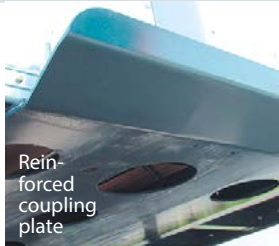

Functional and

Numerous optional accessories can be integrated in our vehicles to make usage easier or to adapt these to specific operational needs :

REINFORCED PROTECTION

Protection of doorlocks

Reinforced coupling plate

Doors with exterior lockrods

Additional threshold plate

- Storage of the different accessories
- Securing of the freight
- Protection and additional reinforcements
- Handling of the freight

STORAGE MEANS

Pallet box

Toolbox

Plank box in rear

Transversal box

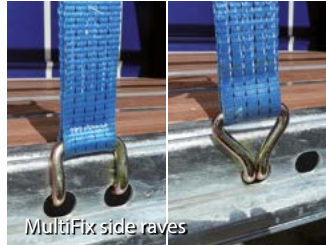

Document holder

Sideplank storage rack

practical options

SAFETY OF THE CARGO

MultiFix side raves

Universal cargo securing ring

Pallet retainer strip

Side planks with cargo securing rail

80 x 40 Stanchion pockets and stanchions

Drop sides

TUV certification

ADDITIONAL EQUIPMENT

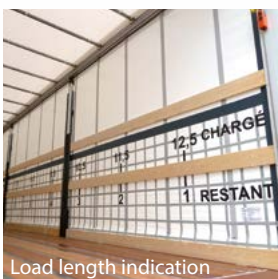

Brake pad wear indicators

Info Centre

Retractable taillift

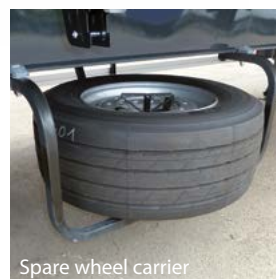

Load length indication

Intégral Open Top

lift axle

Spare wheel carrier

Carry on forklift truck

Services

Maintenance, repair, spare parts, used trailers and finance: FRUEHAUF assures you professional assistance and performing services.

500 Service Centres in Europe

MAINTENANCE REPAIRS

Our network of 500 Service Centres in Europe gives you quick and efficient service on all types of vehicles in your vicinity.

To locate your nearest Service Centre:

www.fruehauf.com/centres-service

SPARE PARTS

The Spare Parts Department guarantees the supply of original manufacturers components, wear parts immediately available from your local Service Point, delivery within 24 hours of specific parts. Identification and ordering on line of all parts for vehicles up to 15 years old.

www.fruehauf.com/servicepro

USED VEHICLES

The used vehicle Department offers a wide choice of vehicles and the professionalism of a leader: complete information on the status of the vehicle, a procedure of intake control covering 30 points (chassis, tyres, brakes, suspension, body) , a specialised workshop to adapt the vehicle to your needs, an on-line offer.

www.fruehauf.com/occasions

FINANCING

In close partnership with the larger finance institutions, our specialised Department will recommend the financing method adapted to your needs: Hire-purchase, Conventional credit, Financial lease or Operational lease.
