THE BEST SOLUTION FOR DISTRIBUTION

Increased payload, better manoeuvrability, efficient and powerful equipment, the FRUEHAUF CITY offers superior performances compared to the traditional 4x2 and 6x2 distribution trucks.

With 10T on the trailer axle and 13T on the truck drive axle, it allows an exceptional and unmatched payload. It takes full advantage of the "Designed to last" concept identical to the 39T FRUEHAUF semi-trailers of which the robustness and reliability are recognised by the market.

The fully welded chassis-frame, its sturdy floors and its reinforced bodies are perfectly adapted to rough and intense transport operations.

Increased payload

19T payload
3 lengths for 21, 24 or 27 pallets
38T gross combination weight
with 3 axle truck

Reinforced bodies

Identical to the 39T semi-trailers with hot dip galvanised chassis for a definite corrosion protection

Better manoeuvrability

With the directional trailer axle and the reduced wheelbase it practically follows in the tracks of the truck

Easy to use

Reinforced retractable tail-lift
2000 kg lift-capacity – platform 1800 mm

All the advantages and the versatility of a Truck / Semi-trailer combination

DIRECTIONAL TRAILER AXLE OF 12 T TECHNICAL DESIGN CAPACITY

Fruehauf developed a new 12T rear-axle with 12T tyre-capacity, mounted under a 140 mm frame with 12T turntable, and integrated into a dedicated platform which is hot-dip galvanized for permanent corrosion protection.

THE COMPLETE RANGE OF A LEADER

The FRUEHAUF CITY range provides the answer to all distribution needs, from the most standard till the more specific :

- Available in 3 lengths :
- 8.50m/21 pallets (combination of 29m²) – 9.85m /24 pallets - 11 m/27 pallets
- Curtainsider body, for industrial loads and pallets
- Vanbody, for supply to the stores in the vicinity and for parcel distribution
- Platform, for the haulage of all types of materials
- Chassis-frames, for refrigerated bodies

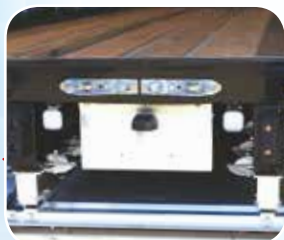

The bodies for the CITY are the same reinforced bodies as used in the 16.6mtr. long trailers and have the same equipment allowing adaptability to the variety of operating conditions.

CURTAINSIDERS

Totally adapted to the distribution of industrial loads and of pallets ...

NOSE DIVING SUPPORTS

REAR WORKING LAMPS

ALUMINIUM DROP-SIDES

CARRY-ALONG FORKLIFT

King-pin plate under turntable
with steering push-rod

Steering rear axle
of 12 tons capacity

Automatic or manual
centralised grease system*

* Optional.

VANS

Ideal for the supplies to stores in the vicinity and for the parcel distribution trades, with 1 or 2 load levels...

RETRACTABLE TAIL-LIFT

REAR-FOLDING TAIL-LIFT

ROLL-UP DOOR

2ND LOAD LEVEL

PIEK NOISE REDUCTION

PLATFORMS

For specialised distribution, building supplies, long iron transport, cranes ...

REMOVABLE SIDEPOSTS

CRANE PLATFORM

CHASSIS FRAMES

For refrigerated bodies
