MaxiSpeed Range

MaxiSpeed sliding curtain vehicles are the ideal solution for just-in-time logistics requirements: simple loading/unloading operations, reduced downtime, improved productivity.

The MaxiSpeed range meets all transport needs, from maximum payload to maximum volume:

- Gooseneck 150
- Gooseneck 120
- Gooseneck 90
- Mega
- Available in 2 and 3 axles

The needs of transport companies have changed significantly in recent years, with a strong return to the demand for robustness, without premature wear and, above all, without the risk of equipment downtime.

With vehicles in full-time use, downtime is extremely costly.

FRUEHAUF has always designed and manufactured robust equipment, whose reputation in the market is well established.

Our mechanically welded platforms, floors, and series bodies are specially designed for intensive and severe use.

Front face with protection

Last beam near the rear crossbar for passage of on-board trolleys

Full protection of the rear assembly with galvanized steel buffers

Welded structural steel platform with I-beams spaced at 400 mm intervals

Running gear, the best technology from leading axle manufacturers

Laminated hardwood floor 35mm thick with galvanized steel omega

Certificate XL

Protection of lockrods

MaxiSpeed Range

The MaxiSpeed range has been designed for maximum safety, focusing on two key aspects:

- Safety of users in contact with the vehicle, through the ergonomic design of parts and equipment.
- Improved road safety through the integration of electronic driver assistance systems, enhancing the vehicle's passive and active safety.

MULTIFIX siderave

2.5-tonne lashing rings

Standard siderave

Taillift

Pallet truck box

Kit for on-board trolley

Quick-Slide

Electric roof

Lifting roof

Liftop
