Safety and comfort

Safe-Control

360° vision

360°vision

With two cameras on the sides and one at the rear Safe-Control provides 360° vision.

The images are relayed to a screen to give a view all around the vehicle.

3 cameras

Control screen

Side cameras

By reducing the risk of accidents, this innovation improves the safety of persons and equipment and also reduces maintenance costs. Driver comfort and efficiency are improved and the vehicle is easier to manoeuvre.
