ExpressLiner

Safe freight transport

AFNOR Cert.10104

Built to last

The ExpressLiner van is the ideal choice for ensuring the safe transport of goods, with particular attention paid to delicate items such as electronics, medicines, wines, and spirits.

The ExpressLiner range is designed to meet all transport requirements, adjusting its capacity to suit loads and volumes.

Transport companies have specific expectations when it comes to operating their vehicles, seeking exceptional durability and resistance to wear and tear over time, with the aim of minimizing the risk of downtime due to equipment problems.

At FRUEHAUF, we have always designed and manufactured equipment that is recognized in the market for its high level of robustness. Our mechanically welded platforms, solid floors, and bodies are specially designed to withstand intensive use and demanding conditions.

Front protection by steel plinth, welded to the shelf.

Mechanically welded platform with I-beams spaced at 400 mm intervals.

An exclusive body assembly, ensuring optimal panel strength and rigidity.

35 mm hardwood laminated flooring with steel omega profiles.

Roof assembly ensuring strength and perfect waterproofing. Protection of clearance lights.

Reinforced rear frame for frequent docking.
